TYPE OF SERVICE YOU ARE APPLYING FOR

- Residential Small Commercial Existing Meter Relocation

This is for temporary service only, once you are ready for permanent service you will need to complete a permanent service load sheet that aligns with your job. Please refer to our website.

Temporary service remains active for a duration of two year from the meter’s initial setup. When you are ready to retire this service, please contact the engineering department at (970)887-3378 ext. 721 and we will furnish you with an affidavit to be notarized and an invoice for the retirement of the equipment. You will continue to receive a monthly bill for the service availability charge until the affidavit and payment are received, and infrastructure removed.

TEMPORARY SERVICE INVOICING

Temporary Invoicing: Once site visit is complete an invoice for temporary service will be sent.

Owner's Responsibility Acknowledgement Form

Thank you for the completion of your load sheet for service at MPEI. Please be aware of the requirements below to keep your job on track. A site visit will be scheduled and an engineering estimate for your application will be provided to you. This is an **estimate** for the services rendered and will be reconciled with actual costs once the job is complete. Your total cost may increase or decrease depending on the actual cost of the job. To help with the process, the following list are items that are required prior to MPEI installing facilities.

Please **INITIAL EACH OF THE FOLLOWING**, to acknowledge your understanding and responsibilities to keep your job on track:

- _____ Full payment of the estimated construction costs according to the contract.
- _____ If you are metering on building, you must have the building staked or a foundation constructed with the meter's location clearly marked before MPEI will design your project. Any changes must be communicated prior to payment to incorporate the requested changes into the estimate. MPEI requires a state inspection prior to MPEI scheduling facility installation.
- _____ If easements are required from adjacent property owners MPEI will prepare any easement documents and inform the applicant of required landowner easements, you are responsible to obtain signatures from property owners for all required easements using MPEI documents. All easements must be obtained prior to contract execution.
- _____ If you are constructing roads where facilities are located, you must have your road to grade within 6 inches prior to any facilities being installed.
- _____ If you would like a copy of our Electric Service Construction Standards, the standards can be requested by emailing loadsheets@mpei.com or by calling (970) 887-3378 ext. 721.

Dates to keep in mind:

- For a service to be completed in the current construction season, your load sheet for service shall be received no later than **August 15**.
- All underground contracts paid before **October 1** should be expected to be completed that construction season. Any contracts paid after October 1st may be subject to additional charges or delays. If the member wishes to continue with the contract after October 1, there is no guarantee the weather will allow for construction of the underground infrastructure within the current building season. There are certain weather mitigation provisions that can be discussed to possibly continue the project at additional expense to the member.

If you have any other questions, please do not hesitate to reach out.

Owner must sign and date this letter indicating you have read and agree to the terms stated above.
