**E. Hardware and Installation Compliance**

MPE Interconnection Requirements:

1. AC main disconnect: Meter Removal - Service Main Disconnect Switch Required (outside building, clearly labeled, & accessible to utility employees 24 hours per day). In the absence of a separate, accessible generation system visible-open disconnect switch, utility workers may open this main disconnect switch at any time without notice as necessary for safe work practices or for restoring quality of service to other customers.

Disconnect Location: \_\_\_\_\_

2. Adequate signage: Meter must have a weatherproof sticker that states alternate energy source is present.
3. Attach additional pages: Site map with meter location and one-line diagram. **Application will not be approved for construction without these documents.**
4. For a full list of interconnection requirements please review our interconnection procedures at <https://www.mpei.com/mountain-parks-electric-incorporated-interconnection-procedures>

The undersigned Contractor acknowledges that MPE's Interconnection Requirements have been followed, as well as:

1. The system hardware is in compliance with *Underwriters Laboratories (UL) 1741, Standards for Safety for Inverters, Converters, Controllers and Interconnection System Equipment for Use With Distributed Energy Resources* – acceptable for use in a utility-interactive system.
2. The system will be installed in compliance with *IEEE 1547, Standard for Interconnecting Distributed Resources With Electric Power Systems* and with applicable requirements of local electrical codes and the *National Electrical Code® (NEC)*.
